CAREER OBJECTIVE

Computer Science Engineering student passionate about innovative frontend development and Java programming, skilled in creating user-focused applications and driving innovative, efficient solutions in tech-driven environments.

EDUCATION

Nadimpalli Satyanarayana Raju Institute of Technology, Visakhapatnam, AP **Nov 2021 - Present**

- Bachelor of Technology in Computer science and engineering

TECHNICAL SKILLS

- **Languages:** Java, Python, HTML, CSS, JavaScript, MySQL
- **Frameworks:** WordPress, FastAPI, React, Material Design
- **Developer Tools:** VS Code, Android Studio, Figma, Power BI
- **Certifications:** User Experience in Designing (Accenture, Future Learn), Programming in Java (NPTEL), Graphic Designing (Udemy)

EXPERIENCE

Java Intern - Demy Software Solutions **June 2022 - Aug 2022**

- Developed and optimized Java applications by implementing efficient algorithms and data structures, improving functionality, code quality, and execution speed with and through team collaboration.

Web Developer Intern - Aframe ,Assistly Technology Company **Feb 2024 - Nov 2024**

- Designed and developed responsive web applications with HTML, CSS, JavaScript, along with integrating APIs and enhancing user experience through cross-functional collaboration.

PROJECTS

Women Safety Application **June 2023 - Present**

- Designed and developed a user-friendly women safety app using React Native and Android Studio.
- Features include real-time tracking, SOS alerts, and local authority integration with optimized performance and secure data handling.

Air and Water Quality Index and Environment Monitoring Application **Nov 2023 - Dec 2023**

- Built an application using Java and Android Studio to monitor real-time air and water quality indices.
- Integrated sensors and APIs to provide visual dashboards, historical data analysis, and critical condition alerts.

Expenses tracker Web Application **Oct 2024 - Nov 2024**

- Developed a responsive web application for tracking and managing expenses efficiently.
- Implemented features such as category-based expense tracking, data visualization, and exportable financial summaries using HTML, CSS, JavaScript, and MySQL.

ACHIEVEMENTS

- Finalist in KAVACH Hackathon 2023, Mumbai
- Finalist in Smart India Hackathon (SIH) 2023
- Winner of Android App Development Hackathon at NSRIT College
